HOW FAR OFF IS PROSPERITY

Congress is doing but little cheese paring, and the appropriations for the year's business will doubtless pended, and mails will return to the railroad routes. The Shipping Board will be given equally reduced appropriations-and in these measures a few "measly millions" will he saved-if partially wrecking our he jailed Mailo on charges that the in the present year. In Washing ton one watches the figures of the Treasury, the Federal Reserve Board, the results of the many surveys of agriculture, industry, labor, crop reports, etc. That forms the basis for identifying Government's relation to progress. The financial with agriculture is equally badvery bad. Over two million laboring men are unemployed. There are a lot of business smashes taking place, but the shelves of the nation are depleted-bare, in many cases. Factories must get busy. From the angle, therefore, of Federal vision, the situation is 50-50. "Big business" chips in its voice

Board Sits Eight Days.

The board of inquiry sat for eight days. Testimony revealed that Boucher for 25 of his 85 days' service, was under suspension on three charges-carrying a pistol, attempting a mutiny and falsehood. Boucher's examination revealed that he posed as a secret service man without authority: publicly criticized the secretary of the navy and the President; insubordinately communicated with authorities in Washington in violation of regulations, and committed many other breaches of naval regulations.

Upon examination he declined to answer many questions on the ground that the answers would incriminate himself. He acknowledged that all charges he made were based upon hearsay and without investigation. It was revealed that documents were stolen from naval officers, but an attempt to introduce these by Greene, who acted as Boucher's counsel, was overruled by the board.

The testimony revealed also that Greene and Boucher created unrest among the natives in an effort to change the government and assume control for themselves. Their activities resulted in organization of natives into a "committee" which forwarded an appeal to President Wilson to remove Governor Terhune, and the native unrest was manifested by several fights with the American sailors.

We have an interesting story to tell about MIOLO. which is churned like butter, here in Cincinnati in our brand-new U. S. inspected churnery.

Although interesting, it is too long to be told in this issue but will be given by installments, one to appear in this paper each week.

In order to enable you to find the installment more easily, we will print the above picture of the carton each time. Watch for it-you are sure to be interested.

In the meanwhile ask your dealer about MIOLO. Proper arrangements will be made that he has it fresh from our churns at all times, and at nearly half the price paid for butter fat.

NEWSPAPER MAN SEES WINTER RAINBOW.

While making the rounds early Friday morning with a NEWS cartier an attache of the paper had the pleasure of witnessing a genuine well-defined rainbow. All the beautiful tints in rainbows in the summer were there and were weildefined. The beautiful visitation spanned the sky in a perfect arch from the horizon to horizon. The phenomenan was witnessed by several other citizens among there J. Simms Wilson, of Mt. Airy. This is an unusual sight for winter time,

A writer in the Lexington Leader tells of a rainbow seen there Tues-

"This morning the overhead sky was overcast and a trace of sleet, or CARLISLE MERCHANT HEADS rather frozen pellets, was falling, but the sun arose from a cloudless but the sun arose from a cloudless but the sun arose from the widest of horizon. INJURED IN ACCIDENT

As the result of an accident caused by a skidding automobile, Mrs. Claude Petree is confined to her bed at the Dr. Martha Petree Sanitarium, on Vine street.

Mr. and Mrs. Petree were riding in the machine when it skidded on the icy street, colliding with an automobile driven by Dr. J. S. Wallingford. Mrs. Petree was thrown from the machine, striking her head on the street. She was taken to the Petree Sanitarium, where an examination disclosed a slight fracture at the base of the skull, which physicians say is not of a serious nature. FEBRUARY

A very general, though erroneous, impression, has gone abroad that merchandise of all kinds is to

continue to drop in price indefinitely, and, moreover, that the factories have cut their prices very deeply. We do not pretend to know about other lines of merchandise, but we do claim to know about our own. We wish to call your attention to A FEW OUTSTANDING FACTS

The Largest Manufacturer in the World of Brass and Iron Beds, Iron and Wood Cribs, Has Reduced His Price Only 7 Per Cent

Rugs have been reduced from 10 to 20%; Furniture of all kinds from 10 to 20%. There is NO reduction in mirrors. Upholstered Furniture will average about 15%. The biggest reduction has been made in goods into which cotton enters into the production therof. SKILLED LABOR still demands and receives practically the same high wages. We have mentioned these things because we want you to believe that you can buy NOW at the best price possible during the WHOLE YEAR at our

for we are giving a cash reduction of NOT LESS THAN 20% on anything in our store and in many, many instances 25, 30, 331/3 and 50%. Remember this, though—the factories are positively not making these big reductions; we are doing it ourselves and TAKING THE LOSS. We have never tried to deceive you by any circus advertising and we never will. We mean what we say when we state we believe we can save you more money during our FEBRUARY AND MARCH CASH SALE than at any time during the year. It is not surprising that President-elect Harding should have re-

celebrations, and the like. And they subscribe to it in exactly the same sprit, for mixed reasons of patriotprofit. So that it may be seen that the talk about the greed of Washingon business men is ridiculous.

But the thing that evidently has nettled Mr. Harding is the quibbling over the experse of somewhere ing their convictions in Chicago and Mr. Cobb told a story of a n:an San Francisco, but a false cry of

> the situation is interesting, and the terrible place." fact is that visitors to Washington for the inauguration will doubtless be saved a good deal of inconvenience by the turn in evenus. The truth is that Washington has never recovered from the condition occasioned by the war. "Sorry, but we can't accommodate you," is a familiar answer one gets when applying for rooms at the leading hotels.

Any kind of an inauguration means big crowds in Washington. The plain, simple kind which Senator Harding asks for will tax Washington to the limit, and these facts, at least, favor curtailing the magnitude of the event.

But after all, isn't the Presidentelect and the country being cheated by the politicians who for political reasons, "holler for a cheap" inauguration? The American way suggets a digrified ceremonial in keeping with what the occasion represents to the country as a whole. Such a ceremony is not likely to occur in the inauguration of the new President and Vice-President.

Chinese Massage.

Medical gymnastics were reduced to a scientific system by Taoist monks. The main point of the Chinese system of massage is the three principal attitudes, standing, sitting and lying, and three modes of breathing, through the mouth, nose and inspiration and expiration alternately through both organs. Iron balls are rolled swiftly to and fro in the hands to strengthen the muscles. To massage the stomach a wooden instrument consisting of three movable wheels is applied.

HUNT TREASURE SHIP

Another Search Started for Sunken Spanish Galleon.

Florida Adventurers Dig Ocean's Bottom for Pirate Ship and Stolen Doubloons.

Miami, Fla.-Another search for treasure-trove-a sunken Spanish galleon laden with stolen doubloons-has begun on the Atlantic coast of Florida, between Deerfield and Boca

Romance has lured this time a group of adventurous men of Deerfield and thereabouts to dig in the ocean's bottom for the buccaneers' pirate ship, which tradition says had hauled too close to the treacherous shores when pursued. A syndicate formed for the search has begun operations where the galleon is supposed to have sunk in the sands.

This is only one of the many such adventures off the south Florida coast which in the old days, before the advent of lighthouses, was the scene of many wrecks. Treasure seekers have brought in a few ancient hulls which had been deeply buried in sand, some dating back five or six centuries. But so far no ship thus recovered has yielded anything except ancient wood. One prospector is said to have spent two fortunes near Stuart before quitting the romantic game.

Fulford, 11 miles north of Miami, has been the scene of many searches. Tradition has it that a pirate ship escaped pursuers by sailing up a creek near Fulford where the crew celebrated by getting drunk.

Seminole Indians boarded the vessel and massacred the crew, except one, the story runs, and the escaped pirate succeeded in rescuing the ship's treasure chest filled with gold which he buried near by, making a diagram of the spot. Unable to return, the pirate tive Committee is now being made is said to have given the diagram to up and will be composed of seven a friend.

APPEAL FOR CHINESE FAMINE SUFFERERS

From every pulpit in Kentucky, an appeal will be made Sunday, February 6, for funds to save the inhabitants of those great Chinese provinces where the crop failure is complete and 40,000,000 persons face starvation. The Rev. Dr. E. Y. Mullins, chairman of the China Famine Fund in Kentucky, has received replies from the ministers of all denominations in the State, indicating that the answer to his appeal for the observance of Sunday, February 6, as China Relief Sunday, will be nearly 100 per cent.

WORLD SECRETS BEING SOUGHT

Sixteen Exploration Expeditions Are Now in Progress or in Contemplation.

MANY PROBLEMS TO BE SOLVED

Most Important Enterprise Is British Antarctic Expedition Headed by Commander John Lachlan Cope -Amundsen Is Trying for North Pole.

New York.-Sixteen exploration expeditions are now in progress or in contemplation after four years of inactivity in this line of scientific research due to the great war. Most of these enterprises have been undertaken or projected since the armistice, and they recall the fact that mother earth still has important biological, zoological, geological, ethnological and meteorological problems to be solved.

One of the most important of these enterprises is the British Antarctic expedition, headed by Commander John Lachlan Cope, F. R. G. S., formerly of the British navy. It is financed for \$750,000, includes five ships, 125 men, several airplanes and extensive wireless apparatus. The undertaking is to require five years and its objects are the circumnavigation of the Antarctic sea, a dash to the south pole, the locating of new whaling grounds and the discovery of supposedly rich gold, silver, coal and ruby fields.

Capt. Roald Amundsen, who discovered the south pole in 1911, left Nome, Alaska, last August in an attempt to reach the north pole. His ship, the Maud, had already spent nineteen months in the Arctic, north of Asia and Europe, and had successfully made the northeast passage. He expected the Maud to be locked in the ice pack and to drift toward the pole when the Arctic winter ended. In negotiating his way to Nome he was frequently compelled to blast a path through the ice.

Captain Amundsen was last heard of off East cape, about 170 miles northwest of Nome in the Bering strait. The explorer, on account of high wages and scarcity of men, was handicapped by lack of help, his only companions being three sailors and an Eskimo

Other Prospects on Foot.

The other interesting expeditions projected or now under way

Siberia-Capt. Axel Landmark and Capt. John Vatney, in a 50-foot power boat are on a 4,000-mile voyage to Kolyma river, using a primitive chart made in 1878 by Nordenskjold, a Swedish explorer on his voyage from Norway to Japan via the Arctic ocean.

Greenland,-Knud Rasmussen, Danish explorer, who returned from the east coast late in 1919, after studying Eskimo tribes, is preparing for another expedition of five years' duration. Lange Koch, another Dane, is planning a scientific survey of North Greenland, his main purpose being to establish Danish sovereignty in that

territory. Africa-Four expeditions are in progress, namely, the Mackie ethnological expedition to Central Africa for the Foster) as a candidate for Jailer of purpose of studying the Bahima, one of the chief pastoral tribes of An-British natural history of museum expeditions to the west coast and the Jeb-Maria mountains; the duke of Abruzzi's effort to find the sources of the Webi Shebeli river, which flows from Abyssinia through Italian Somaliland into the Indian ocean, and the entomological tour of the Belgian portion of Tanganyika and the eastern a strange race of pigmy savages, as well as gathering a wonderful collec-

tion of moths and butterflies. Baffin Land-Donald P. He expects to establish a camp 700 miles south of Etah in Northwest Greenland, where his Crocker Land expedition passed four winters. He will attempt to circumnavigate Baffin Land and penetrate 1,500 miles of its western

> Nova Zembla-Dr. Olaf Holtedahl of Christiania university is organizing a northwestern natural science and geological expedition to this country and plans to start next summer.

> Mexico-Prof. Emelio Oddone, a famous Neapolitan seismologist, representing the Italian government, is now studying the earthquake situation in Mexico by means of his "inerviameter," an invention by which he is able to measure both motion and energy.

Will Explore Amazon.

The Amazon-Exploration of this great river to be undertaken by a large party of American scientists, headed by Dr. Henry H. Rusby of Columbia university. The party expects to leave early in January and to traverse more than 1,000 miles of almost virgin land in the upper reaches of the river basin. Dr. Rusby is to be accompanied by Dr. of Indiana, who are to study fish and

and volatile oils. Ecuador and Peru-Collections of flora and fauna are now being gathered for the American Museum of Natural History in New York by Capt. Harold E. Anthony and George K.

Pacific Islands-Solution of the origin of the Polynesian race is one of the objects of a survey of the Pacific Islands planned at a recent conference of scientists at Honolulu under the auspices of the Pan-Pacific Union, representing the United States, Canada, Great Britain, Australia, New Zealand, Hawaii, the Philippines and Japan. An expedition will be sent to the South seas for this purpose by Yale, Harvard and other institutions.

China and Tibet-The third expedition, backed by a fund of \$250,000, is soon to start from Central Asia under the leadership of Roy Chapman Andrews, associate curator of mammals in the American Museum of Natural History, New York. The Chinese government is expected to co-operate with this enterprise. .

TRIES SABOTAGE IN INDIA

Labor Is Said to Have Adopted Tactics to Gain Ends in Various Parts of Country.

Calcutta.-Indian labor for the last two months has been adopting sabotage tactics to gain its ends in various parts of the country.

A notable example is one in Madras, where the provincial government has just issued a communique in reference to the railway disaster last opinion of the government, is the seventh out of eight cases of sabotage, committed between August 14 and October 21.

The strike of stevedores in this city has held up in port 111 ocean-going steamers, instead of the normal 50 usually here. The accumulation of cargoes amounts to thousands of tons, and the glut is accentuated by the importers' financial difficulties, due to fall in the exchange.

PHILADELPHIA HAS BIG YEAR

Foreign Trade in 1920 Beats All of Port's Former Records, Say Commissioners.

Philadelphia.-All foreign trade records here were surpassed in 1920, according to commissioners of the port.

Combined values of imports and exports totaled \$742,224,997, an increase over the previous record year of 1919 of \$65,960,391.

A gain of \$126,303,656 was shown in the value of imports over the previous year. Exports fell off \$60,-343,265.

A feature of the export trade was the large quantity of coal shipped to foreign countries during 1920, when 2,490,867 tons of bituminous and 120,-746 tons of anthracite coal was shipped, compared with 1,007,300 tons of bituminous and 45,189 tons of anthracite in 1919.

Button Causes Girl's Death.

Danville, Ill .- Jane Holmes, thirteen years old, is dead, following the accidental entrance of a cloak button into her throat. She placed the button in her mouth and it slipped into her throat. Surgeons pushed it into her stomach, and it was ejected by vomiting. There was an injury to the throat passages, which developed blood poisoning, and death resulted.

Much wishwash is spouted nowadays about the terrific responsibility under which high-salaried men stagger, strive and struggle through the heat and stress of their work. 'If anything goes wrong." says the ten-thousand-a-year magnate, "I'm to blame. The mass of a thousand details rests on my competent shoulder. I have to be a Hercules to get away with it. I'm the boss! The underlings only have to go ahead and do their daily stunts. But I! Me! I've got to see that the dividends come rolling in. No wonder they pay me big money. They know the sense of responsibility that engulfs me is liable to shorten my life by ten years."

But there is another side to the story. In the first place, the "un-derling" tiptoes along with the knowledge that, if the boss is criticized, the boss is going to make a goat out of someone under him. Why not? He's human! And every conscientious men, whether he's paid a thousand a month or twenty a week, feels the responsibility of doing well what he has to do. The human mind is capable of only just so much worry-and the boss can't worry any more fatally than the "underling."

Furthermore, the subordinate has a whole set of responsibility senses to which the magnate is, as a rule, a stranger. It is the underling who is attacked by the most harassing responsibility yet by man, that of making a slim pay envelope stretch effectively over a large area of ex- a man's companion knows of his shortpenses. Marriage is like a furnace. When two people marry without love, then life becomes a furnace. Instead of a sacrament, it becomes a sacrilege or a sacrifice. Jealousy, hatred, revenge feed its flames until it either destroys or purifies. The great William D. Taylor production of "The Furnace" is one of the most tremendous presentations of this question yet conceived on the screen. You will be profoundly moved by the struggle of the people in "The Furnace" for happiness and love. Here is a picture which for drama, power, and dazzling scenic effects, has never been surpassed.
